LETTER OF AGREEMENT FOR COLLEGE SOFTWARE PROJECT

PROJECT TITLE: VENUE VUE: AN OFFLINE-FIRST POINT-OF-SALE AND MANAGEMENT SYSTEM

DEVELOPMENT TEAM: CTRL + STAY

INDUSTRY CLIENT: TRAVELBEAN MNL

MEMORANDUM OF AGREEMENT

This Letter of Agreement (the "**Agreement**") is entered into and made effective as of this ____ day of _____, 2026, by and between:

CTRL + STAY, a student software engineering development team from the Department of Computer Studies / Information Technology, College of Engineering and Information Technology, Cavite State University – Don Severino delas Alas Campus, Indang, Cavite, represented by its Project Manager, **Zaki Zapico**, and team members **Jenny Lyn Roquid** and **Rhea Mae Gregorio**, hereinafter referred to as the "**Student Developers**";

– and –

TRAVELBEAN MNL, a mobile pop-up coffee business with primary operational address at Pampanga St., Tondo, Manila, represented by its Owner, **Rhona Mae Aganan**, and Co-Owner / Operations Manager, **Jimwell Mamangun**, hereinafter referred to as the "**Industry Client**."

(The Student Developers and the Industry Client may individually be referred to as a "Party" and collectively as the "Parties.")

RECITALS

WHEREAS, the Student Developers comprising **CTRL + STAY** are undertaking an academic software engineering project requirement for degree completion at Cavite State University, focusing on the design, development, and deployment of a customized, offline-first point-of-sale (POS) and inventory monitoring application named **Venue Vue**;

WHEREAS, the Industry Client, **TravelBean MNL**, operates a mobile pop-up coffee establishment requiring automated order management, daily transaction logging, and inventory tracking without reliance on continuous internet connectivity;

WHEREAS, the Industry Client agrees to serve as the academic project beneficiary, providing operational data, access to setup environments during events, and feedback for testing and system evaluation;

WHEREAS, both Parties seek to define their respective roles, intellectual property rights, data protection measures, and operational boundaries under applicable laws of the Republic of the Philippines;

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements set forth herein, the Parties hereby agree as follows:

SECTION 1. PROJECT OBJECTIVES AND DELIVERABLES

The Student Developers agree to design, build, and turn over **Venue Vue** tailored to the operational needs of **TravelBean MNL**, fulfilling the following key objectives within an academic timeframe of five (5) months:

1.1 Offline-First Architecture & Infrastructure Setup

- **Local Network Setup:** Deploy a standalone local server environment (PHP/MySQL) running on a primary laptop workstation that creates a local Wi-Fi hotspot for mobile tablet endpoints.
- **Network Independence:** Ensure full POS functionality (order taking, sales logging, product pricing) during events without requiring active cellular data or internet connection.
- **Multi-Device Data Sync:** Provide post-event data transfer mechanisms (Local Wi-Fi Hotspot Sync, Direct USB Import, or Excel/CSV file import) to merge tablet order logs into the primary database.

1.2 Digitalization of Pop-Up Operations

- **Order Management Module:** Replace manual paper order lists with touch-friendly tablet entry interfaces for baristas, featuring automated calculation of subtotals and change.
- **Inventory Monitoring:** Implement automated stock deduction per order and low-stock notification alerts to reduce waste and prevent stockouts during events.
- **Sales Tracking & Reporting:** Generate automated end-of-event sales summaries, daily sales logs, and exportable Excel (.xlsx) or PDF performance reports.

1.3 Backup, Recovery & User Orientation

- **Database Backup Utility:** Build local daily database export capabilities (.sql files and external USB exports) to safeguard business operational records against device loss or corruption.
- **Training & Documentation:** Conduct user demonstration sessions for TravelBean MNL owners and baristas, accompanied by a complete User Manual and System Operations Guide.

SECTION 2. SCOPE OF SOFTWARE USE AND LICENSE

- **Non-Commercial Academic License:** Venue Vue is provided to the Industry Client free of software licensing charges as part of an academic student project initiative.
- **Permitted Operational Use:** The Industry Client is granted a non-exclusive, non-transferable, revocable license to utilize Venue Vue solely for its internal business operations at pop-up locations and events.
- **Restrictions:** The Industry Client shall not sell, lease, sublicense, commercialize, or redistribute Venue Vue to external third parties, nor modify or reverse-engineer the underlying source code without prior written consent from CTRL + STAY.

SECTION 3. ROLES AND RESPONSIBILITIES

3.1 Responsibilities of CTRL + STAY (Student Developers)

1. Design, code, and test Venue Vue according to the agreed project scope and academic milestones.

2. Provide technical support, user orientation, and system deployment assistance during test events.
3. Provide complimentary bug fixing and system maintenance for a period of six (6) months following official system turnover.
4. Maintain strict confidentiality regarding all financial and operational metrics disclosed by TravelBean MNL.

3.2 Responsibilities of TravelBean MNL (Industry Client)

1. Provide accurate baseline operational data (menu offerings, pricing tiers, initial inventory counts) needed for system initialization.
2. Supply necessary physical hardware required for operation (Windows laptop workstation, mobile/tablet endpoints, USB backup drives).
3. Participate in evaluation sessions, usability testing, and complete feedback forms required for academic defense documentation.

SECTION 4. INTELLECTUAL PROPERTY AND ACADEMIC RIGHTS

- **Ownership of Source Code:** Pursuant to the **Intellectual Property Code of the Philippines (Republic Act No. 8293)** and Cavite State University academic guidelines, the Student Developers (**CTRL + STAY**) retain full legal ownership, copyright, and intellectual property rights over the source code, system architecture, database structure, and original UI design of **Venue Vue**.
- **Academic Presentation Rights:** **CTRL + STAY** and Cavite State University reserve the right to demonstrate the system, publish non-confidential screenshots, present project methodologies, and submit findings for academic defenses, competitions, research journals, and institutional archives.
- **Client Data Ownership:** All operational data, customer logs, sales figures, and transactional records generated through TravelBean MNL's use of **Venue Vue** remain the exclusive property of **TravelBean MNL**.

SECTION 5. DATA PRIVACY AND CONFIDENTIALITY

5.1 Compliance with Data Privacy Act

Both Parties agree to adhere strictly to the principles of data privacy governed by the **Data Privacy Act of 2012 (Republic Act No. 10173)**. CTRL + STAY shall implement user authentication mechanisms (hashed passwords using `password_hash()`) and role-based access control within **Venue Vue** to secure system entries.

5.2 Confidentiality Obligations

- **Confidential Information:** Refers to all non-public operational metrics, financial logs, supplier details, business strategies of TravelBean MNL, as well as the proprietary source code and credentials developed by CTRL + STAY.
- **Non-Disclosure:** Neither Party shall disclose, publish, or disseminate the other Party's Confidential Information to any unauthorized third party without prior written authorization.
- **Duration:** Confidentiality obligations shall remain binding during the term of this project and survive for a period of two (2) years following system turnover.

SECTION 6. LIMITATION OF LIABILITY AND SUPPORT

- **Academic Disclaimer:** Venue Vue is provided as an academic student project product. While CTRL + STAY endeavours to ensure robust software operation, the software is provided on an "as-is" basis for academic evaluation and internal testing.
- **Liability Cap:** The Student Developers shall not be liable for business interruptions, loss of profit, or hardware failures occurring during pop-up events. TravelBean MNL remains responsible for maintaining physical hardware backup procedures (e.g., secondary paper logs during hardware loss).

SECTION 7. PROJECT DURATION AND TERMINATION

- **Term:** This Agreement commences on the date of signing and remains effective through system development, academic defense, turnover, and the subsequent six (6) month support period.
- **Termination:** Either Party may terminate this Agreement upon fourteen (14) days written notice in the event of academic policy changes, mutual agreement, or material breach of terms.

- **Post-Termination:** Upon termination, TravelBean MNL shall cease active deployment of unfinalized builds, and both Parties shall return or securely destroy shared confidential materials.

SECTION 8. GOVERNING LAW

This Agreement shall be governed by, construed, and enforced in accordance with the laws of the **Republic of the Philippines**, including the **Civil Code of the Philippines (R.A. 386)**, **Intellectual Property Code (R.A. 8293)**, and **Data Privacy Act of 2012 (R.A. 10173)**.
