# **SWOT ANALYSIS**

**TRAVELBEAN MNL**

**Date of Issue:**

**May 3, 2026**

**Project Manager/Group Members:**

**Zapico, Zaki**

**Roquid, Jenny Lyn**

**Gregorio, Rhea Mae**

## I. SWOT IDENTIFICATION

| Strength                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Weakness                                                                                                                                                                                                                                                                                                                                                                                                 | Opportunities                                                                                                                                                                                                                                                                                                                                                                                                             | Threats                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>• The business has a unique concept using a motorcycle coffee setup, which attracts attention at events</li> <li>• It is mobile and flexible, allowing service in different locations like schools, weddings, and parties</li> <li>• The team is open to feedback and continuous improvement (Research and Development )</li> <li>• Setup during events is quick and manageable</li> <li>• Uses social media and connections effectively to find clients</li> </ul> | <ul style="list-style-type: none"> <li>• All operations are manual, including sales tracking and order management</li> <li>• Inventory is tracked only through Excel and manual lists, which is inefficient</li> <li>• The team is small (only 3 members)</li> <li>• No permanent shop, so income depends only on events</li> <li>• No system to analyze past event performance or sales data</li> </ul> | <ul style="list-style-type: none"> <li>• Increasing demand for coffee services at events (schools, weddings, etc.)</li> <li>• Opportunity to open a physical coffee shop for stable daily income</li> <li>• Can expand through partnerships and referrals</li> <li>• Availability of digital tools (POS systems, apps) to improve operations</li> <li>• Social media offers low-cost marketing and wider reach</li> </ul> | <ul style="list-style-type: none"> <li>• High competition from many coffee businesses, especially those with physical shops</li> <li>• Rising prices of ingredients and supplies</li> <li>• Economic challenges affecting small businesses</li> <li>• Lack of own transport increases operational expenses</li> <li>• Weather and logistics can affect event operations</li> </ul> |

## II. SWOT STRATEGIES

| Environmental Factors                         | External Opportunities                                                                          | External Threats                                                                   |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| Own Strengths                                 |                                                                                                 |                                                                                    |
| <b>1. Strong Social Media and Connections</b> | Use social media platforms and partnerships to attract more customers at low marketing costs.   | Strengthen online engagement to stay competitive against established coffee shops. |
| <b>2. Unique Mobile Coffee Concept</b>        | Promote the mobile coffee setup to attract clients during events and increase referrals.        | Use the unique coffee concept to stand out from competitors.                       |
| <b>3. Flexibility and Mobility</b>            | Maximize mobility by serving different events and locations to meet increasing demand.          | Adapt quickly to weather changes, logistics concerns, and event conditions.        |
| Own Weaknesses                                |                                                                                                 |                                                                                    |
| <b>1. Manual Sales and Order Tracking</b>     | Implement a POS system to automate sales and order tracking for better accuracy and efficiency. | Reduce manual errors and delays that may affect business performance.              |
| <b>2. Inefficient Inventory Management</b>    | Use a digital inventory system to monitor stock levels and prevent shortages or overstocking.   | Improve inventory tracking to reduce waste and manage rising supply costs.         |
| <b>3. Limited Manpower</b>                    | Build partnerships and referrals to support operations despite limited staff.                   | Use automation tools to reduce workload and improve productivity.                  |

### III. PROBLEM IDENTIFICATION

- A. Manual sales tracking
- B. No POS system for order management
- C. Inventory tracking is inefficient
- D. No record of past event performance
- E. Limited manpower
- F. No permanent shop
- G. High transportation and operational costs
- H. Rising cost of supplies

### IV. PROBLEM STRATIFICATION

$C \rightarrow A \rightarrow D$

$B \rightarrow A$

$E \rightarrow A$

$F \rightarrow G$

$G \rightarrow H$

- $C \rightarrow A \rightarrow D$ : Poor inventory tracking leads to manual sales tracking, resulting in lack of data from past events
- $B \rightarrow A$ : No POS system leads to manual tracking of orders
- $E \rightarrow A$ : Limited manpower increases manual workload
- $F \rightarrow G$ : No shop leads to reliance on events, increasing transport costs
- $G \rightarrow H$ : High operational costs become worse with rising supply prices

## V. PROBLEM PRIORITIZATION

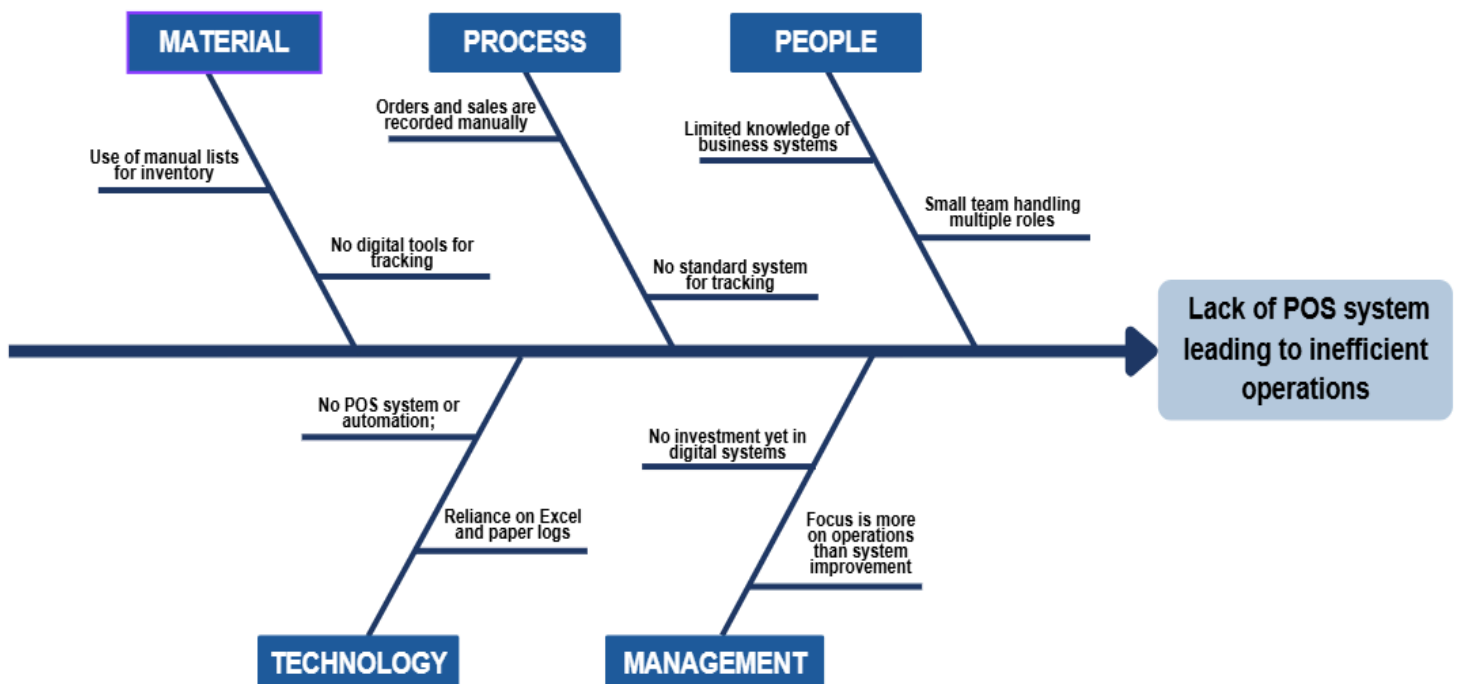

Criteria:

- Urgency
- Impact of productivity and quality
- Familiarity of members
- Solvability
- Implementability

Scoring Scale: 0 = Lowest, 10 = Highest

| Problem                   | Urgency | Impact | Familiarity | Solvability | Implementability | Total | Rank |
|---------------------------|---------|--------|-------------|-------------|------------------|-------|------|
| No POS system             | 9       | 9      | 9           | 8           | 8                | 43    | 1    |
| Manual sales tracking     | 8       | 9      | 9           | 8           | 8                | 42    | 2    |
| Inventory tracking issues | 8       | 8      | 8           | 7           | 7                | 38    | 3    |
| High operational cost     | 7       | 8      | 7           | 6           | 6                | 34    | 4    |

## VI. FISHBONE ANALYSIS

## EVALUATION SECTION

| Deliverables           | Assigned to                    | Date Assigned  | Date Due    | Date Submitted | Remarks    |
